الرسم الهندسي بمثابة اللغة التي يتمكن المهندس من خلالها من التعبير عن أي تصميم على النحو الذي يمكن للآخرين فهمه وتطويره وتصنيعه. ويكون هذا الرسم وفقا لمعايير متفق عليها بالنسبة للشكل والتسمية والمظهر والحجم وما إلى ذلك. ويهدف الرسم الهندسي إلى استيعاب كافة الخواص الهندسية لمكون ما أو منتج ما بشكل واضح بما لا يدع مجالا للبس. والغاية الأساسية من الرسم الهندسي هي توصيل المعلومات الأساسية التي تمكِّن المُصنّع من إنتاج هذا المكون.

والرسم الهندسي والرسم الميكانيكي أو رسم الآلات هي لغات فنية وهندسية ومثلها أي لغة تستخدم في التفاهم ونقل الأفكار الهندسية بين الناس، سواء كان ذلك عن طريق الكتابة (تحضير رسومات) أر عن طريق القراءة (دراسة رسومات سبق تحضيرها). والرسم الهندسي ليس رسمًا كالمعروف بين الناس، فهو يختلف في صورته ونظام تحضيره ما يحويه من بيانات تتصل بالصناعة والتصميم والإنتاج الصناعي، فأية صورة فوتوغرافية لأي قطعة ميكانيكية لا يمكن اعتبارها رسمًا ميكانيكيًا لعدم فائدهما للصناعة والإنتاج والدراسة الهندسية الأمر الذي يحتاج إلى معرفة المقاسات، والمواد المصنوعة منها.

والرسم الهندسي كلغة له قواعده وأسسه ولا يمارسه إلا من درسه دراسة سليمة رمدى التحصيل فيه يتوقف على المران الكامل والدقة التامة. وتستخدم لغة الرسم بين رجال الصناعة (عمال ومشرفين ومهندسين مخترعين) كوسيلة رهي الوسيلة الوحيدة للتفاهم بينهم على ما يرغبون في إنتاجه وصناعته من منتجات لاستخدامها في حياة الإنسان كما أنها اللغة التي يمكن الاحتفاظ بالمستندات التي تتصل بالاختراعات والتصميمات فيسهل الرجوع إليها عند الحاجة.
